OBJECTIVE

Results-driven Full Stack Developer with a proven track record of 4 years specializing in MERN (MongoDB, Express.js, React.js, Node.js) stack development, with a strong emphasis on Angular. Highly proficient in JavaScript and its frameworks, particularly Angular and ReactJS. Adept at crafting web and mobile applications using Angular and React Native, along with expertise in developing Chrome extensions. Demonstrates exceptional problem-solving skills and a steadfast commitment to creating efficient, user-friendly applications. Committed to delivering high-quality solutions that meet both business and user needs.

EDUCATION

Bachelor of Computer Applications (B.C.A.) , Apex University	2018 - 2021
Master of Computer Applications (M.C.A.) , Chandigarh University	2022 - 2024

SKILLS

Technical Skills	JavaScript, AngularJs, Angular 8+, NGRX, ReactJS, NextJS, React Native, NodeJS, ExpressJS, MongoDB, Auth0, OpenAI Integration, GraphQL, TypeScript, JQuery, Redux, Shopify
-------------------------	--

EXPERIENCE

Senior Software Engineer Appinventiv Technologies	December 2024 - Present <i>Noida, India</i>
---	--

- Developed and executed unit tests using Jest, ensuring application reliability and performance.
- Optimized React and Next applications by improving rendering efficiency, reducing bundle size, and enhancing page load speed.
- Authored comprehensive technical documentation, including code guidelines, API references, and feature specifications, to streamline development and onboarding.

Senior Software Engineer Thoughtpearls Infotech Private Limited	April 2023 - December 2024 <i>Jaipur, Rajasthan</i>
---	--

- Developed a comprehensive Angular application with TypeScript, seamlessly integrating Material UI for an enhanced user experience, demonstrating meticulous attention to detail and a results-driven approach.
- Developed cross-platform mobile applications using React Native, ensuring a consistent and seamless user experience across iOS and Android platforms.
- Integrated back-end APIs and services using NodeJS and ExpressJS for smooth data communication.

Full Stack Developer Flipshope E-com Shopping Solutions	Feb 2021 - April 2023 <i>Jaipur, Rajasthan</i>
---	---

- Developed and maintained web applications using Angular as the primary framework, ensuring high performance and scalability.
- Developed Chrome extensions using JavaScript to enhance browser functionality and provide useful features for users.
- Used Cypress for unit testing, creating scripts to simulate user interactions and scenarios, ensuring expected behavior of application components and modules.
- Utilized GraphQL to optimize data fetching and create dynamic, responsive web applications, enhancing the user experience.

- Actively participated in Agile sprints, providing regular updates and contributing to team discussions.

PROJECTS

Flipshope - AI-Powered Chrome Extension The AI-driven Chrome extension is a powerful tool designed to enhance the e-commerce shopping experience. With advanced features such as price tracking, interactive graphs, auto-buy functionality, and automatic coupon application, this extension revolutionizes online shopping.

KSTARIA E - HOSPITAL Spearheaded the development and implementation of a comprehensive Hospital Management System using Angular15 for creating User and Admin dashboards. Focused on optimizing stock cataloging, inventory management, and enhancing the efficiency of inpatient and outpatient services.

Hyyzo - Cashback App The all-encompassing cashback app for various e-commerce platforms is a user-friendly and efficient solution designed to maximize savings for online shoppers. This app offers a seamless experience across multiple e-commerce websites, providing users with cashback rewards for their purchases.

Kushal's Fashion - Ecommerce App It is a cutting-edge ecommerce app, featuring a sleek UI built with React Native and powered by Shopify for its backend API. This combination ensures a seamless and personalized shopping experience. The app allows users to effortlessly find their ideal fashion items with advanced search and filtering options. AI-driven personalized recommendations tailor suggestions to individual preferences, enhancing the shopping experience. A smooth and secure checkout process with multiple payment options ensures convenience, while real-time inventory updates keep users informed about product availability.

Entaengine - AI Solutions AIEngine is an innovative AI toolkit designed to revolutionize the grant proposal process by integrating a wide array of OpenAI features. This project aims to streamline and enhance various aspects of grant proposals, including document analysis, image creation, transcription, translation, real-time chat, OCR, PDF parsing, text-to-speech, and embedding capabilities. Leveraging the power of OpenAI's GPT-3.5 architecture, AIEngine is a versatile solution that combines the capabilities of multiple AI services into a cohesive and user-friendly platform.

ACHIEVEMENTS

- Received **Rising Star Award** and **Star of the Quarter Award** for outstanding performance, exceptional dedication, and significant contributions. Recognized for consistently exceeding expectations and demonstrating a strong commitment to delivering high-quality results.
